

CLEAN UPGRADE

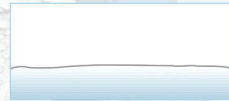

Innovative smart and clean glaze
Integrated firing at 1280 °C
Forming self-cleaning glaze,
Smooth, fine, mildew-proof, self-cleaning,
Keep ceramics clean and protect health.

CERAMIC GLAZE UNDER MICROSCOPE

TRADITIONAL GLAZE

There are concave and convex dirt invisible to the naked eye, and mold is easy to hide in it, which is not easy to clean.

INTELLIGENT GLAZE

It is more delicate and smooth, without dirt hiding, and easy to clean.

Soft-Closing Seat Cover

Slow seat cover technology can reduce the noise, collision and breakage of the seat cover when it is closed.

Sewer Glazing

The inner surface of sewer is glazed so that the sewer is smooth and nowhere for dirt to hide, and no blocking anymore.

Big Pipe Has More Momentum

The pipeline design with enlarged diameter, with new channels and high temperature treatment, the glaze reaches a fine and smooth texture, and is highly smooth, which can help the dirt to wash instantly and clean as new.

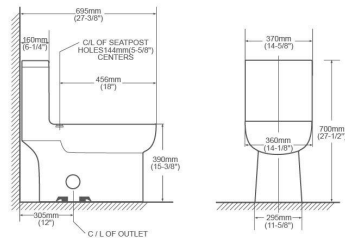

The design carried out around different details is to meet users with different needs. The original intention of focusing on research and development remains unchanged. Only products with continuous innovation and iteration can make life better.

One piece toilet
 Size : 27-3/8" × 14-5/8" × 27-1/2"
 695 × 370 × 700mm

 Comfort Height
 Optional 1.1Gpf/1.6Gpf Dual Flush available
 3" Flush valve
 Fully glazed tray way
 S-trap 12" (305mm) roughing-in
 Chrome plated/white plastic hand lever available

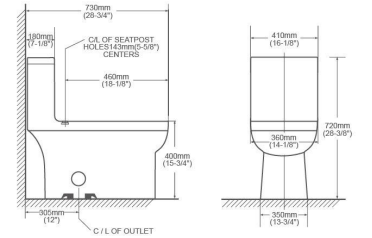

In recent years, consumers have paid more attention to the concept of environmental protection and energy conservation, which is very important for product design. Focusing on optimizing product performance and developing green energy-saving products have become the main trend of bathroom design, which is also the main direction of our research and innovation.

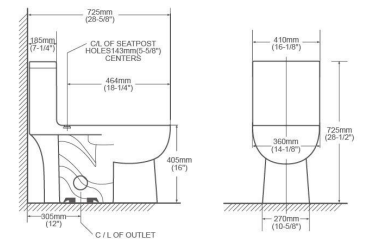

One piece toilet
 Size : 28-3/4" × 16-1/8" × 28-3/8"
 730 × 410 × 720mm

Use clean and pure materials to express the deepest feelings in the most delicate way. Touching the texture of the skin is our initial goal. I hope the bathroom can give you a rest in daily life and let you enjoy every moment of relaxation

Each ceramic toilet is designed to take care of the heart of every resident. From exploring the meaning of a better life, we can shape the outline of the home through people's life trajectory, habits and aesthetic awareness, let the sense of art awaken the sense of living music, and give the space more vitality.

Attention to detail optimization is our eternal direction. From the design of ultra-thin cover plate to the optimization design of pipes, it is the result of numerous experiments and adjustments, and repeated deliberation. The subtle changes make the toilet feel more comfortable, and bring more convenience to users unconsciously.

With low saturation color as the basic tone, it has its own advanced sense, and uses smooth materials to form a natural texture. With the decoration of hardware and ceramics, it shows us a comfortable and natural bathroom space.

MINIMAL BATHROOM SPACE

A seemingly simple and minimalist bathroom has many hidden details and decoration skills. With clean and pure white sanitary ware, it designs a minimalist life and a world for one party to enjoy, and seeks the most appropriate expression in this space.

Advanced nudity design, which emphasizes natural simplicity and pays attention to inner peace and prosperity, is different from the pursuit of refined luxury. It just builds a pure land of mind far away from the mundane for modern people who are tired of aesthetics, injects the metaphor of life into the space, and conveys this simple and quiet beautiful perception.

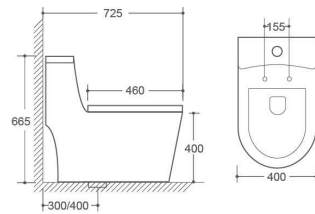

The perfect match between the log floor and the light must be the mottled sense of light and shadow. I like the light and shadow reflected in the room through the mirror, or warm, or lazy, or soft, or quiet, as long as the years are quiet, as long as the time stops.

INSTALLATION DISPLAY

TOILET FLUSHING SYSTEM

The patented VORTEX flushing technology is adopted for the edgeless toilet to achieve good waste transportation with the lowest water consumption. It also replaces 100% of the intercepted water in each cycle to prevent bacterial growth. Not only the self-cleaning glaze technology is used on the glaze surface, but also our R&D engineers have designed the glass without flush edges; Therefore, no hidden and inaccessible places will lead to bacteria breeding and odor.

SUPER VORTEX SIPHON

The Super Vortex siphon flushing mode is specially developed for "Continuous Cycling". It removes dirt more easily, keeps interior surfaces clean, and saves a lot of water.

360° JET SIPHON

The inner socket is 360° clothed, and a large amount of water flow from all directions strongly flushes the inner wall of the toilet, which makes it difficult for dirt to adhere.

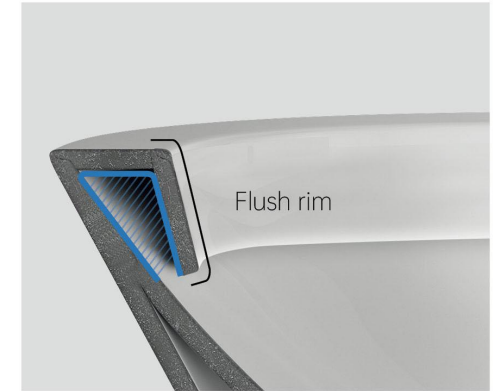

RIMLESS FLUSHING SYSTEM

Creative open rim design
Easy to keep clear

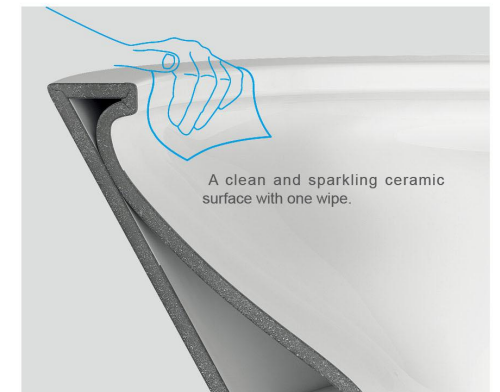

360 All-around high-efficient
55mm water enclosure to minimise odours

ALL IT TAKES IS A FEW SIMPLE STEPS

1 Remove the old toilet and tank.

2 Open the wall and floor.

3 Route the drain and supply; prepare the wall studs.

4 Install the tank and carrier.

5 Install the wallboard and wall finishes.

6 Mount the flush plate and wall-hung toilet.

Easy to Clean

With no obstacles on the floor, no tank to clean, and no exposed pipework, a wallhung toilet makes cleaning easy.

Saves Space

The Cistern in-wall system takes up less space than a conventional toilet, and the concealed installation offers flexibility in small spaces.

Strong and Durable

The wall-hung toilet bolts simply and securely to the mounting frame. This sturdy system holds up to 400 kg.

Saves Water

Dual-flush saves water – a cost-effective solution for the home and a more sustainable concept for the environment.

Easy to Maintain

The one-piece tank is guaranteed not to leak. The stylish flush plate offers easy access to all internal components.
